Foreword

This manual presents the elements of LabBook accessible to a person with "biologist" rights. If you do not have access to any of the actions via your interface, please contact your administrator so that these rights can be assigned to you.

For a biologist's work to be finalized for LabBook, the analysis result must be validated biologically. Once this validation is done, a report appears to provide feedback to the patient.

Home page

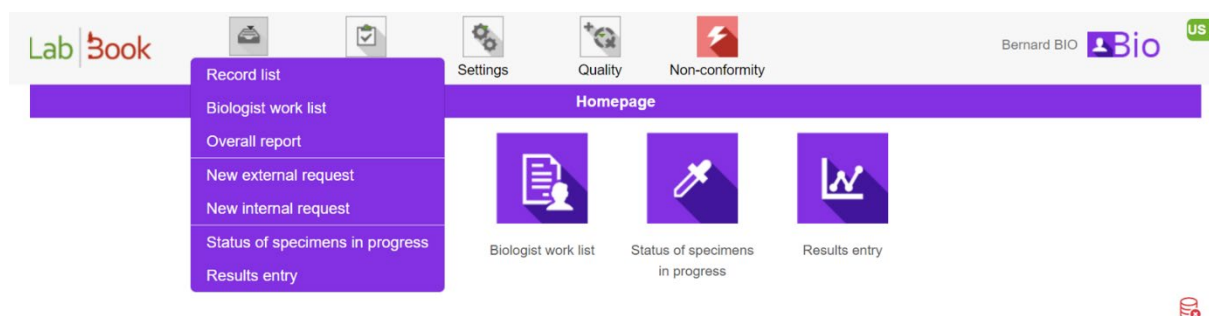

The screenshot shows the LabBook home page interface. At the top, there is a navigation bar with icons for Administrative, Reports, Settings, Quality, and Non-conformity. Below this is a purple header bar with the user's name 'Bernard BIO' and a 'US' language selector. A blue callout box points to the user profile icon, stating: 'Allows you to disconnect Edit profile and password'. An orange callout box points to the 'US' language selector, stating: 'Allows you to change the language of the'. A red box highlights a database icon in the top right corner. Below the header, there are several tiles: 'Record list', 'Biologist work list', 'Status of specimens in progress', and 'Results entry'. A large pie chart titled 'Validations to be carried out' is displayed. To the right of the chart, a grey callout box points to a 'Laboratory' section, stating: 'Here you have the information about the last backup'. The 'Laboratory' section lists: 'Last number', 'Number of', and 'Number of'.

By hovering the mouse cursor over the icon next to your name, you have the option to log out, edit your profile and password:

- Disconnection: Allows you to leave the application by closing your account.
- Edit user: Allows you to edit your profile information (login, first name, last name, ...)
- Edit password: Here you can change your password

This home page allows you to directly access the file entry and work lists for your profile.

The "Overall Report" submenu allows you to download all the reports in a single pdf file. You have the possibility to specify a date and also "Exclude those already downloaded".

Download scan reports in one file

Date from to Exclude those already downloaded ☐

[Back](#) [Retrieve data](#)

For the use of the functions "Results entry" and "Current sample status", please refer to the Manual for the "Technician" category.

Emergency management

If you see the logo  on your home screen, it means that some files have analyses to be done urgently. By moving the mouse over this logo, the software will indicate the number of analyses

concerned:

You have the list of these analyses in urgency by clicking on the icon "Urgencies".

Biologist work list

(In the "Administrative" menu or directly on the "Biologist work list" icon on the home page)

This list shows you the files that require your intervention. This list allows you to make a grouped biological validation by clicking on the button "Start the grouped validation" : that is to say that the

files will be linked to each other to allow you to validate them directly one after the other.

Group validation

Start the grouped validation

Group validation

The grouped validation allows you to link the validations for the files requiring an action from you. You will therefore enter each file to validate it. Once this is done, you will move on to the next file. At the end of all the validations, a grouped printout will be possible using the button :

Grouped report

(Which can be found at the bottom left of the page)

Validation biologique - 159 QAWG6 - test RAKOTO - Né(e) le 2000-03-21 - 22 années

Hémogramme (Numération Formule Sanguine) [Hématologie, Immunohématologie et Hémostasie]

03/2023

			Numération			
			Hématies	10.0 million/mm3		
			Hémoglobine	11.0 g/dl		
				15 %		
				15.0 fl		
				11.0 pg		
			Formule leucocytaire			
			Concentration (CCMIH)	73.3 %		
			Leucocytes (LCR)	1.0 mille/mm3		
			Polynucléaires neutrophiles	2.0 %		
			Polynucléaires éosinophiles	3.0 %		
			Polynucléaires basophiles	5.0 %		
			Lymphocytes	4.0 %		
			Plaquettes			
			Monocytes	8.0 %		
			Plaquettes	6 mille/mm3		

Once the validation is done, you can :

- Add new analyses if you think additional analyses are needed, by the option at the bottom of the page;

Add new analyzes

Click to start a search

Next record

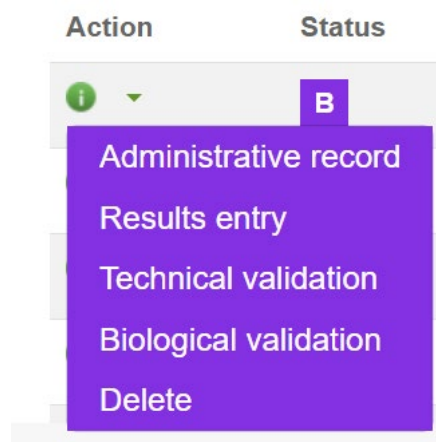

- Go to the next folder with the button (at the end of the page and on the right)

The report is generated on each page at this location:

And by clicking on this link, you have the possibility to download and print the report. You can see the number of downloads of the report with the number (..) after the Model result.

Validation by file

For each folder, in the "Action" column, click on the down arrow next to the "i" icon, you will have several choices:

- "Administrative file": allows you to view the information entered when the file was registered. It also allows you to print an invoice or to reprint a report.
- "Biological validation": allows the biological validation of the recorded results and the output of an associated report.
- "Delete" : BE CAREFUL ! This allows you to delete a folder.
- The biologist account has the possibility to do the tasks of the secretary account through the "Results entry" action and the tasks of the technician through the "Technical validation" action.

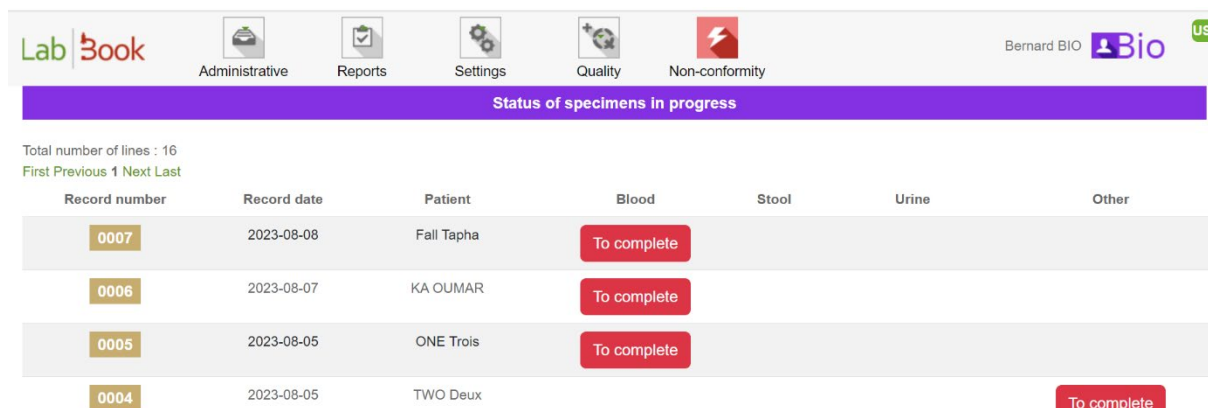

Signature

From LabBook 3.5, it is now possible to integrate the biologist's signature into the report during biological validation. This signature feature enables the biologist to record an electronic signature to be added to the report.

To add it, log in and click on the user icon, then on edit user and upload it from the signature field.

Status of current withdrawals

This module allows you to enter the samples taken in the laboratory. To do so, you can go through the icon on your home page or through "Administrative", "Status of specimens in progress".

Record number	Record date	Patient	Blood	Stool	Urine	Other
0007	2023-08-08	Fall Tapha	To complete			
0006	2023-08-07	KA OUMAR	To complete			
0005	2023-08-05	ONE Trois	To complete			
0004	2023-08-05	TWO Deux				To complete

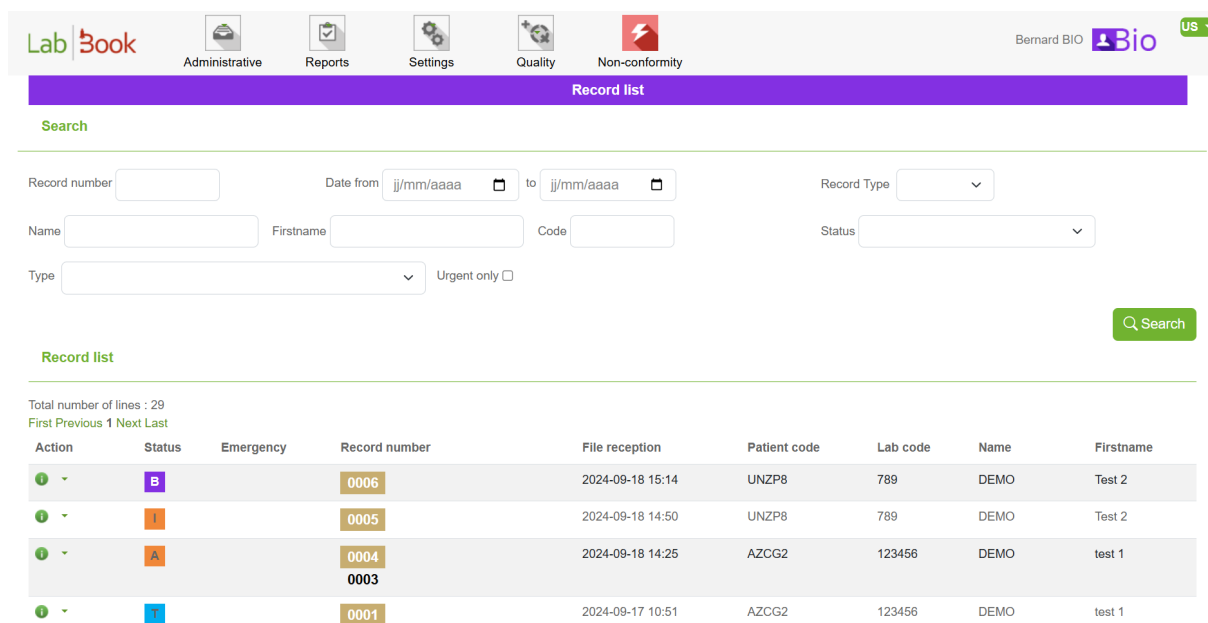

This table summarizes for each file, the list of withdrawals to be made.

If the line shows "To be entered", it means that no data has been entered for the collection in question.

If the line shows "Modify", it means that information has been entered for the file. However, you can access it at any time to post a change.

List of files

You can access this list either via the icon on the home page or via the menu "Administrative", "Record list".

Action	Status	Emergency	Record number	File reception	Patient code	Lab code	Name	Firstname
1	B		0006	2024-09-18 15:14	UNZP8	789	DEMO	Test 2
1	I		0005	2024-09-18 14:50	UNZP8	789	DEMO	Test 2
1	A		0004 0003	2024-09-18 14:25	AZCG2	123456	DEMO	test 1
1	T		0001	2024-09-17 10:51	AZCG2	123456	DEMO	test 1

This display allows you to quickly see the files in progress. So if someone calls you to know the status of a file you can quickly answer. The different existing statuses are the following:

- A: administratively validated (no test results have been entered in the file)

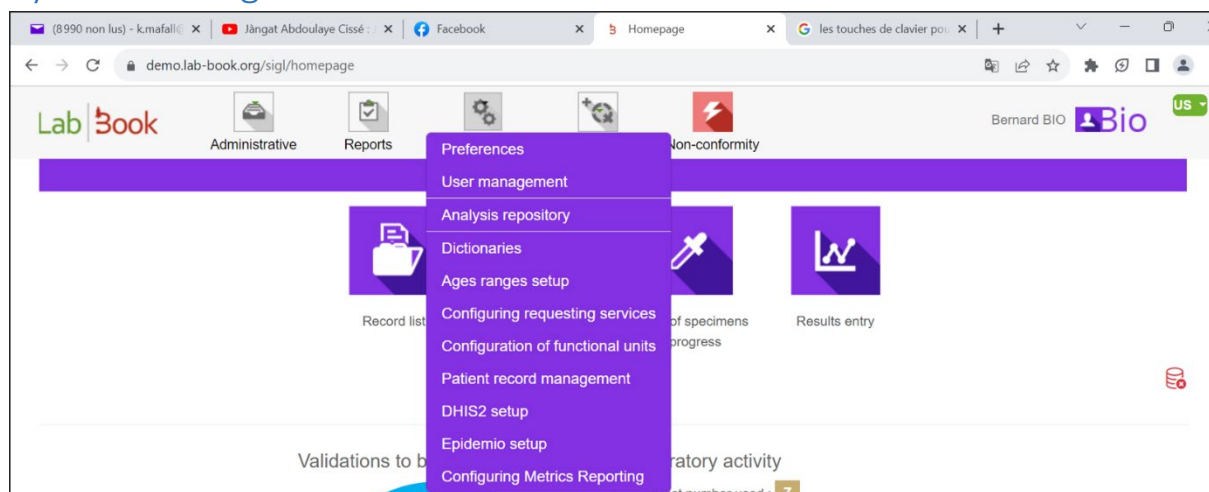

- T: technically validated (results have been entered and validated by the technician. The biologist must validate the results to create the report).
- B: biologically validated (the results were validated. The report could be edited. By clicking on the file, you can see when).
- I: some elements have been validated but not all of the requested analyses.

N.B.: If your file has an "Internal laboratory file number", it is displayed in the file number column

(and after the file number) 

In the Actions menu, on , you will find the elements that allow you to act on the file as presented in the technician work list.

System settings

Via the menu "Settings", "Preferences", you can make changes to the parameters of your application. Each line can be edited directly on the input fields of the value column.

Everything about document headers allows you to change the way your lab is displayed on invoices and reports.

List of preferences

Label	Value
Unit price for sampling and analysis procedures	1000
Document header 1	Nom du laboratoire
Document header 2	Sxxx au capital de xxx € RCS xxx xxx xxx autorisation n°xx xxx
Document header 3	Horaires : du lundi au vendredi : 07h00-19h00, le samedi : 07h30-12h00 www.example.com

Document header - City	Ma ville
Inpatient billing	<input checked="" type="checkbox"/>
Default age unit (Days, Weeks, Months, Years)	Years
Automatic disconnection (mn)	23
Quality module activated	<input checked="" type="checkbox"/>
Invoicing module activated	<input checked="" type="checkbox"/>
Language of reports	French
Language of the repository	French

[Exit](#) [Save](#)

If your laboratory's practice is to bill for tests performed on hospitalized patients, you only need to edit the line corresponding to "Inpatient billing" to replace the 0 with a 1.

The Quality and Invoicing modules can be activated/deactivated in the same way by replacing the 0 (inactive) with 1 (active).

The automatic logout time allows you to determine after how many minutes of inactivity a user is logged out. This ensures that a user does not stay logged in for too long when not using the software, which could allow someone else to access the software on their behalf.

You can also change the languages of the reports and the repository. For the repositories, there are only two languages available: French and English.

The "Save" button allows you to save these settings.

Benchmark of analyses

The test repository is the element that allows you to indicate the tests done in your laboratory. It allows you to activate/add/deactivate them. It also allows you to change their prices, their analysis family and the sample(s) needed for this analysis.

Use of the repository via the software

Action	Code	Designation	Abbreviation	Family	Status	Bio. product
	781	Dépistage syphilis		Immunologie	Activated	
	ABCL	Antibiogramme 1ère ligne des mycobactéries en milieu liquide	ATBBKML TUB	Bactériologie	Activated	
	B001	Acide urique (uricémie)		Biochimie sanguine	Activated	PB1 : Prélèvement de sang veineux
	B002	Bicarbonates		Biochimie	Activated	PB1 : Prélèvement de sang

At the bottom of the list, you have the possibility to add an analysis. Remember to check via the search engine that the analysis is existing or not before adding it so as not to create confusion when creating the folder.

N.B.: The "List of variables" button allows you to see all the existing variables in the software and identify the number of analyses using each variable

Add a new analysis

The interface allows you to create new analyses by filling in at least the "Code" and "Procedure designation" fields.

You are also asked to indicate the variables that people should fill in for this analysis. You can also choose to display normal min/max values during technical and biological validation by checking the "Min/max display" option.

This interface allows you to search for a user. In the actions menu, you can :

- Edit a user: this allows you to change the information (name, first name, email address) as well as its rights;
- Edit password: allows you to manually change the password of a user;
- Deactivate user: Allows you to suspend a person's access;

Exporting users and connections

You can export the users to a csv file by clicking the "Export users" button at the bottom right of the list.

The "Export connections" button allows you to obtain a list, in a csv file, of the connections of each user. You can also specify the recovery of data between a date.

Reports

You have access to the tool that presents the standard LabBook reports.

Epidemiological Report

This report presents a number of indicators. You have the details of the report in the Epidemiology tab with the disease, the nature of the sample, the total received, the total analysis and the results.

You can also search for a specific report by entering the date range on the "Search" tab.

Indicators report

The indicator report can be used to customize the data to be displayed on the disease, the nature of the sample, the total received, the analysis total and the results. To customize this report, you need an account (biologist, root, etc.) with access right to the "Settings" menu, then to the "Configuring Metrics Reporting" submenu.
